

FORCE TRIM

Model FT-100

Controller (Panel Mounted)

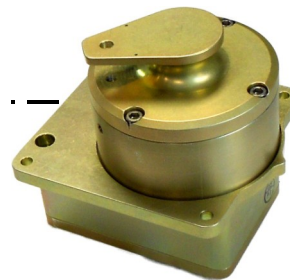

Trim Release Switch (Cyclic-mounted)

Force Trim Unit (Roll)

Force Trim Unit (Pitch)

Features & Benefits

- Gives the pilot “hands free” time to perform other activities.
- Reduces pilot stress & fatigue
- Holds the cyclic in place using a Force Gradient system that provides a “force feel” as the control is moved away from its center “engage” position.
- Light weight
- Upgradable to a full-function Autopilot/SCAS system
- Engaged and disengaged by using a switch mounted on the instrument panel.
- Can also be interrupted by use of a convenient “Trim Release” switch on the cyclic grip for short-term maneuvering or re-centering.
- System weight is less than 5 lbs., installed.

***Introductory price: \$3,995
+ installation kit***
